REALLED Wireless Control System

Intelligent Cloud Management Online Remote Control

Internet of things (IoT) enabled solar street light solution networks the solar street lights with the Terminal control client end, Lora terminal controller and GPRS-Lora and discharge cycle on battery management, to monitor the solar panel and light operation modes, failure warnings, and supports the total maintenance which makes the overall project smarter, cost effective and easy to maintain.

► Introduction

The direct connection scheme is adopted, and there is no centralized manager, and the signal transmission is carried out through the base station of the mobile operator. The solar controller, wireless communication module, cloud server, client (mobile app, WBE terminal) consists of 4 parts

Solar controller: Intelligent solar controller can collect the current, voltage, temperature, power generation, power consumption, and other information of the system (battery panel, battery, LED load, etc.), and transmit the data to the communication module through the interface. It can receive commands from the client to switch lights and parameter adjustments.

Wireless communication module: Transmit the information of the solar controller to the cloud platform through the network, which is a bridge connecting the controller and the cloud platform.
Cloud server: The cloud server is deployed on Alibaba Cloud and Amazon Cloud and is responsible for system scheduling, data storage, data processing, logical transaction processing, etc. It is the subject of the Wireless Monitoring and Management System.

Client: The client includes web and mobile apps. The user can view the data of the cloud service through the client, and at the same time control the switch lights and adjust the street light parameters through the cloud server.

Product introduction

Lumileds LED

Creating World Class Lighting

Superior Outdoor LED Chips

Luminous Efficiency Reach Up To 160lm/w

Finished Product Luminous Efficiency Over 150lm/w

Combined with the outstanding heat dissipation design, the pure aluminum lamp base with sealed lens makes the lighting more effective and prolongs the life span of LED

Bat Wing

Spread light Lens

Brand new light distribution lens design, significantly improve the lighting effects, illumination, and uniformity. Design especially to suit various light distribution types.

- Common for lead-acid batteries and lithium batteries, operating parameters can be set via the remote control.
- Using ultraGreen power consumption control technology, with extremely low static power consumption and sleep current. Lead-acid battery multi-stage temperature compensation constant voltage charging.
- Time programmable load power/time control.
- Battery charge and discharge high and low temperature protection function, working temperature can be set.
- A variety of intelligent power modes can be selected, which can automatically adjust the load power according to the battery power. High-precision digital boost constant current control algorithm, high efficiency and constant current accuracy.

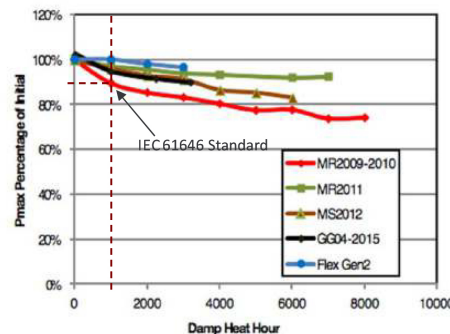

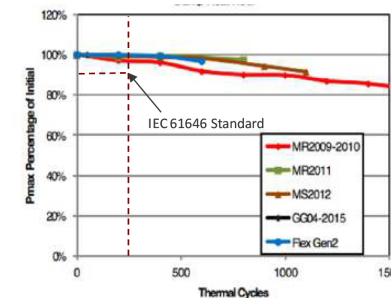

Long weather resistance
Excellent anti-PID(Potential Induced Degradation)
Certified in fireproofing for safety

Lower temperature coefficient
Improved temperature coefficient decreases power loss in the high temperature application.

Superior quality control
ISO 9001:2015 Quality Management System
100% EL and appearance inspection

Excellent power generation performance
Guaranteed 0~+3% positive rated power tolerance ensures more power generation every day

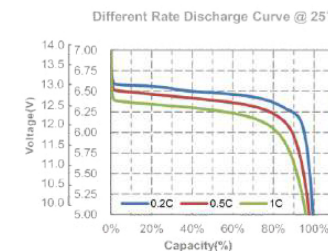

Stable mechanical performance
Passed rigorous hail test
Withstands 5400Pa snow and 2400Pa wind loads

Low-light Performance
Advanced glass and solar cell surface texturing allow for excellent performance in low-light environments.

- Lithium Iron Phosphate (LiFePO4) Battery
- Safest lithium chemistry with high energy density
- Built-in automatic protection for over-charge, over-discharge, over current, and over temperature
- Efficient & long-lasting up to 4000+ cycles DOD 50%
- >2000 cycles @0.2C, Charge/Discharge at 100% DOD
- Internal cell balancing
- Wide temperature range: -20°C ~ 70°C
- Maintenance-free after installation
- Cost-effective

ALL-IN-ONE

Solar Street Lighting

Perfect solutions in street lighting

► 1.PIR Sensor

Integrated design, intelligent lighting; Can achieve "people to the light on, people go out the light dim"; Sensitive response, energy saving and environmental protection; High efficiency and energy saving, long life, stable performance

► 2.Aluminium Frame

Beautiful appearance atmosphere, a variety of colors to choose; Oxygen resistance and corrosion resistance, long service life, and environmental protection can be recycled; Safe and stable, good strength and bearing capacity; Has a strong corrosion resistance;

► 3.Aluminum Die-casting

Aluminum die-casting has good strength, not easy deformation, high precision and durability

► 4.Magazine Batter Box

Ammunition box type battery box, easy to replace, better waterproof performance, prolong the service life of the lamp; Equipped with higher life and more abundant energy lithium battery, the battery life is long

► 5.Adjustable bracket

The bracket Angle can be adjusted to meet the lighting requirements of different elevations (20°)

► 6.Module Light

IP68 LED light engines; Lumileds/ Cree/ Osram LEDs; Super long lifetime (lumen maintenance); Multiple lighting distributions available; Wide applicability for Complex situations.

Product data-MELA

Main Features

Optical cover / lens type	Polycarbonate
Command interface	IR remote control
Guarantee	5 years
Materials	Die-casting Aluminium
Dimmable	Yes
Automatic Dusk to dawn detection	Yes

Electrical Specifications

Battery type	Lithium battery
Battery capacity (ampere-hour)	>345Wh
Battery voltage	12.8 V
Battery charge and discharge cycles	2000-3000
Panel type	Monocrystalline
Panel voltage	18 V
Peak panel intensity	60 W
Type of charge controller	MPPT

Charger efficiency	>90%
Charge controller power	40 W

Management and gradation

with gradation	yes
Configuration possibilities	Configurable

Materials and finishes

Total length	1100 mm
Total width	380 mm
Total height	315 mm
Color	Gray

Standards and recommendations

Protection index code	IP66
-----------------------	------

Mechanical shock protection code	IK09
----------------------------------	------

Initial Performance (IEC Compliant)

Initial luminous flux	>5200 lm
Initial proximal color temperature	2700-6500 K
Color rendering index (initial)	>70

Terms of use

Ambient temperature range	-20 to +50 °C
Ambient temperature range - load	0 to +45 °C
Ambient temperature range - discharge (when the light is on)	-20 to +50 °C
Autonomy	> 48 h (with fully charged battery)

Solar dimming profile	First 2 Hrs - On motion : 100%, without motion :30%; Next 3 Hrs - On motion : 60%, without motion :20%;Next 6 Hrs On motion : 30%, without motion :10%; Rest 1 hour: On motion: 50%, without motion :30%
-----------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Network connection type	Off grid
Battery location	Inside Luminaire

Optional functions

CCTV	Yes
Extra decorative led strip light	Yes
Electric supply	Yes
Adjustable module	Yes

Materials	Die-casting Aluminium
Dimmable	Yes
Automatic Dusk to dawn detection	Yes

Electrical Specifications

Battery type	Lithium iron phosphate battery
Battery capacity (ampere-hour)	>422Wh
Battery voltage	12.8 V
Battery charge and discharge cycles	2000
Panel type	Monocrystalline
Panel voltage	18 V
Peak panel intensity	80 W
Type of charge controller	MPPT

Charger efficiency	>90%
Charge controller power	60 W

Management and gradation

with gradation	yes
Configuration possibilities	Configurable

Materials and finishes

Total length	780 mm
Total width	670 mm
Total height	510 mm
Color	Gray

Standards and recommendations

Protection index code	IP66
-----------------------	------

SOLAR LIGHTING SYSTEM

Solar Street Lighting

Perfect solutions in street lighting

▶ **1. Economical**

Since the sun gives energy without any charge, one can enjoy thirty percent power savings on the electricity bills as well as a long backup lighting system at no running cost.

▶ **2. Non-Polluting**

Powered by the renewable energy of the sun, this system is a clean source of illumination.

▶ **3. Hardly No Maintenance**

Solar lighting system includes some moveable parts that reduce the danger of breakage. After it is installed, the system lasts for a long span of time and needs negligible attention.

▶ **4. Easy to installation**

Solar light fastened to the pole or wall with screws and gasket, IP65 waterproof, which can work in any severe weather.

▶ **5. Induction mode**

Starts automatically at dusk, automatically closes at sunrise. It provides more than 24 hours continuously lighting from after full charging at daytime

▶ **6. Safety: electric shock or fire**

Due to the low voltage of 12-24V, the solar street lamp has stable voltage, reliable operation and no hidden dangers. It is an ideal product for the ecological community and the road administration department. There are no accidents such as electric shock or fire.

Solar Panel

A GRADE high efficient
 Mono: 18% convert efficiency
 Poly: 17% convert efficiency

Smart Controller (PWM or MPPT)

Automatic light and time control

Light Fixture

LED Wattage: 60/90/120W
 Chips: Lumileds 3030 or 5050
 Housing: die casting aluminum

Light pole

Material: Q235 steel
 Hot dip galvanized, powder coating

Gel battery/ Lithium battery

fully sealed construction
 ABS plastic buried battery box
 Batteries can be placed underground
 or under solar panels(ONLY FOR LITHIUM BATTERY)
 3-4 days rainy days back up

Product data-RL-FT

Solar Lighting Solutions

Perfect solutions in solar lighting

▶ **1. Economical**

Since the sun gives energy without any charge, one can enjoy thirty percent power savings on the electricity bills as well as a long backup lighting system at no running cost.

▶ **2. Non-Polluting**

Powered by the renewable energy of the sun, this system is a clean source of illumination.

▶ **3. Hardly No Maintenance**

Solar lighting system includes some moveable parts that reduce the danger of breakage. After it is installed, the system lasts for a long span of time and needs negligible attention.

▶ **4. Easy to installation**

Solar light fastened to the pole or wall with screws and gasket, IP65 waterproof, which can work in any severe weather.

▶ **5. Induction mode**

Starts automatically at dusk, automatically closes at sunrise. It provides more than 24 hours continuously lighting from after full charging at daytime

▶ **6. Safety: electric shock or fire**

Due to the low voltage of 12-24V, the solar street lamp has stable voltage, reliable operation and no hidden dangers. It is an ideal product for the ecological community and the road administration department. There are no accidents such as electric shock or fire.

Solar Post Top Light Series

Product data

Main Features

Optical cover / lens type	Polycarbonate
Command interface	IR remote control
Guarantee	3-5 years
Dimmable	Yes
Automatic Dusk to dawn detection	Yes

Electrical Specifications

Battery type	Lithium iron phosphate/ GEL battery
Battery charge and discharge cycles	2000-3000
Panel type	Monocrystalline
Type of charge controller	MPPT/PWM
Power	40-100 W
Configuration possibilities	Configurable
Protection index code	IP66
Autonomy	> 48 h (with fully charged battery)

OPERATING MODE

1.) Intelligent operate mode: 100% power in 1 hour, 70% power in 3 hours, 20% power until daylight

2.) Intelligent sensor: as per below (can be customized)

3.) Time control and Sensor control: as per below (can be customized)

▶ **4. Easy to installation**

Solar light fastened to the pole or wall with screws and gasket, IP65 waterproof, which can work in any severe weather.

▶ **5. Induction mode**

Starts automatically at dusk, automatically closes at sunrise. It provides more than 24 hours continuously lighting from after full charging at daytime

▶ **6. Safety: electric shock or fire**

Due to the low voltage of 12-24V, the solar street lamp has stable voltage, reliable operation and no hidden dangers. It is an ideal product for the ecological community and the road administration department. There are no accidents such as electric shock or fire.

Specification Sheet

Item Number	SCP-01
Control Method	Automatic ON/OFF
Solar Panel	Mono
Battery Capacity	Lithium battery
Charging Time	5 hours
Autonomy	2 days
Battery Autonomy	>24 hours
Working Temp.	-15 ~ +70
Waterproof Rating	IP65
Housing Material	Aluminium
Finishing	Black / Satin Chrome / Customized

Specification Sheet

Item Number	SCP-02
Control Method	Automatic ON/OFF
Solar Panel	Mono
Battery Capacity	Lithium battery
Charging Time	5 hours
Autonomy	2 days
Battery Autonomy	>24 hours
Working Temp.	-15 ~ +70
Waterproof Rating	IP65
Housing Material	Aluminium
Finishing	Black / Satin Chrome / Customized

Specification Sheet

Item Number	SCP-03
Control Method	Automatic ON/OFF
Solar Panel	Mono
Battery Capacity	Lithium battery
Charging Time	5 hours
Autonomy	2 days
Battery Autonomy	>24 hours
Working Temp.	-15 ~ +70
Waterproof Rating	IP65
Housing Material	Aluminium
Finishing	Black / Satin Chrome / Customized

Specification Sheet

Item Number	SCP-04
Control Method	Automatic ON/OFF
Solar Panel	Mono
Battery Capacity	Lithium battery
Charging Time	5 hours
Autonomy	2 days
Battery Autonomy	>24 hours
Working Temp.	-15 ~ +70
Waterproof Rating	IP65
Housing Material	Aluminium
Finishing	Black / Satin Chrome / Customized
